REASONS FOR ALLOWANCE

1. Claims 1-57 allowed over prior art.
2. The following is an examiner's statement of reasons for allowance: the prior art made of record fails to teach or fairly suggests in combination device operating in a master mode and being switch between linkage and data communication modes, when in linkage mode, device sending out inquiry signals seeking communication with another device that shares the same communication protocol but in slave mode; the device exchanging addresses with another device that shares the same communication protocol but in slave mode and that responds to one of inquiry signals and then switches into data communication mode; device thereafter retrieving from memory any data that are to be transmitted, forming the data into error-correctable, addressed data packets, sending out the packets, and thereafter awaiting acknowledgement of successful receipt of such data, to transfer the data in an error free manner from it to another device that shares the same communication protocol.

The prior art fails to teach or fairly suggests in combination a handshake protocol according to which the first and second transceiver units operate, which causes the transceiver units to continuously attempt to exchange addresses by one broadcasting its address and by the other responding with its own address; the first and second transceiver units, following the successful exchange of addresses, placing themselves into a data communication mode where each communicates exclusively with the other and where said first and second units remain in data communication mode indefinitely.
